Ms. Abi
Principal

Dear Parents,

As I walk around our school, it's inspiring to see learning in full swing and classroom environments beginning to take shape. The energy and enthusiasm of our students and teachers is palpable, and it's clear that we are off to a great start this school year.

In my weekly newsletters, I will be focusing on one of the Learner Profiles in the International Baccalaureate (IB) program. Over the next 10 weeks, I will explore each Learner Profile in detail and discuss its importance for both current academic success and future readiness. This week, our focus is on being, Inquirers. This fundamental skill empowers students from ages 3 to 18 to ask questions, explore new ideas, and seek out knowledge with curiosity and enthusiasm. By fostering a culture of inquiry, we prepare our students not just for academic success but for lifelong learning and discovery.

Looking ahead, the ability to be an inquirer is crucial for future success. According to the World Economic Forum's Future of Jobs report and insights from McKinsey, the workforce of the future will demand skills such as critical thinking, adaptability, and a continuous drive for learning. Cultivating an inquiry-based mindset helps students develop these essential skills by encouraging them to question, investigate, and understand the world around them. This not only enhances their academic performance but also equips them with the tools to navigate an ever-changing landscape.

To support this at home, you can:

- Encourage Questions: Foster an environment where asking questions is valued and explored. Engage in discussions about their interests and prompt them to delve deeper into their curiosities.
- Model Inquiry: Show your own enthusiasm for learning by exploring new topics or hobbies together, demonstrating that learning is a lifelong journey.
- Promote Exploration: Provide opportunities for hands-on activities and projects that allow your child to experiment, investigate, and learn through experience.

By nurturing an inquiry-based mindset at home, you'll help your child develop a passion for learning that will serve them well in the future, fostering skills that are increasingly important in our rapidly evolving world.

ABT Diagnostics Assessments in All Heritage Subjects: 23rd-27th Sept

We will be conducting ABT assessments with students from G3-G10 during scheduled Arabic A and B, Islamic and UAESS classes. The scores will not contribute to the students' final grades, but the ABT assessments will provide valuable insights into their learning progress and help us identify areas where they require additional support. Please ensure your child brings their iPad fully charged to school to guarantee they can complete the assessment successfully.

Islamic Coffee and Connect: 23rd Sept from 8-9:00 am

Please join our in the Knowledge Hub to learn more about the Islamic curriculum and engage with our teaching approach. Enjoy a cup of coffee, connect with our team, and gain insights into your child's Islamic learning journey.

PYP Coffee and Connect: 25th Sept from 8:15-9 am

Join our first PYP Coffee and Connect in the Knowledge Hub where we will discover how the PYP fosters a holistic approach to education, where students become lifelong learners with a deep understanding of the world around them. Our session will focus on PYP's philosophy, curriculum framework, and the concept of transdisciplinary learning. Whilst this session is geared towards parents new to the IB, all parents are welcome. We will adapt and ensure we extend your knowledge.

Taaleem Bio Blitz Competition

An exciting adventure for the entire school community and Taaleem!

This is your chance to explore and capture the amazing biodiversity around us. Snap photos, potentially discover new species, and contribute to our growing catalog of local nature. Whether you're a nature lover or just curious, everyone can participate. Stay tuned, more details coming soon.

MYP/DP and SPARX maths

The MYP/DP Maths team is excited to announce all students will have access to SPARX, a personalized Maths platform that adapts to each learner's needs. It offers tailored tasks and challenges to support every student's growth. Parents will receive an email to sign in and view their child's progress on the platform. We're eager to see the positive impact SPARX will have on our students' learning in Maths!
