

RAHA REMINDERS

Khalifa City Campus

Dear Parents,

It's been a busy but enjoyable week here at KCC! Lessons and assessments are in full swing, and I'm pleased to share that attendance across the school remains strong—thank you for your continued support in making this possible.

We were especially proud to be named one of the top three schools in the ADEK Wellbeing Award this Wednesday evening, selected from all schools across the emirate. This recognition is a true celebration of the care, connection, and community we nurture at Raha.

As we look ahead, our focus on learning and growth remains central to all we do at KCC. Assessment is viewed not as a one-time event, but as an ongoing conversation about each child's development, shaped by the IB philosophy and the UAE School Inspection Framework. From the Early Years to the Diploma Programme, we value observation, feedback, and personalized progress to support every learner's journey.

Through play-based insights, reflective projects, subject rubrics, and formal assessments, we aim to help students understand their learning and grow as independent, resilient thinkers. We believe every child deserves to be both challenged and supported, and we tailor learning accordingly. While GL assessments offer helpful benchmarks, they are just one part of a much broader story—one told daily through reflections, classwork, and real-life learning experiences.

Thank you for continuing to walk alongside us as we nurture confident, thoughtful, and capable learners.

Wishing you and your families a restful and happy weekend.

Warm regards,

Abi

Yearbook UPDATE!

The link to pay for the yearbook will expire on the 15th June. Please order your book now before stock runs out. Delivery will be next week.

Please complete these 2 steps when ordering online.

- Go to the payment link [here](#). Expires 15th June.
- After payment is complete, please fill form to confirm [here](#).

Any questions? Please email: kccexecassistant@ris.ae

Grade 5

Grade 5 to 6 Transition: Dates to remember

- Shadow Day - 17th June: G5 students will experience what it is like to be a G6 student for a day.
- G5 to 6 Parent Evening - 17th June: From 3:30-5pm in the Black Box

Please reach out to the homeroom teacher or Ms. Eileen G6 LTL (emccrea@ris.ae) for any questions.

WEEKLY HSE BULLETIN

Jun 10th, 2025 | Raha International School, Khalifa City Campus, Abu Dhabi

Did You Know?

Our school has always prioritized the health and safety of students and staff by continuously monitoring indoor air quality (IAQ) within our facilities. As part of our strategic commitment to Occupational Health and Safety, we have recently increased our focus on IAQ as a key factor in promoting wellbeing.

In collaboration with ADEK, regular assessments are carried out to measure critical air quality parameters inside the school, including carbon dioxide (CO₂), carbon monoxide (CO), and relative humidity levels. These parameters are essential indicators of air circulation efficiency, the presence of pollutants, and overall ventilation performance.

Elevated levels of CO₂ can cause drowsiness, reduced concentration, and lower cognitive performance, especially in enclosed classrooms with many occupants. Meanwhile, even low concentrations of carbon monoxide pose serious health risks, making continuous detection and control crucial to prevent long-term exposure. Additionally, humidity levels—often overlooked—play a significant role in respiratory comfort and mold prevention. Low humidity can cause dryness and irritation, while high humidity creates conditions that promote microbial growth.

We are proud to report that our school remains within the recommended standard levels of CO₂, maintains 0 levels of CO, and consistently operates within normal humidity standards, ensuring a safe and comfortable learning environment for all.

By routinely monitoring these parameters and conducting indoor air testing, the school not only ensures compliance with ADEK guidelines but also takes a proactive approach to improving indoor environmental quality. The data collected guides targeted actions such as upgrading ventilation systems, optimizing HVAC settings, and implementing preventative maintenance measures.

Ultimately, maintaining healthy indoor air quality is not just about meeting regulatory requirements—it forms a foundational part of our vision to create a safe, supportive, and high-performing educational environment.

ISO 45001 Audit Preparations

As part of our ongoing commitment to maintaining the highest standards of occupational health and safety, kindly note that our school will undergo a comprehensive ISO 45001 audit on Thursday, June 12. The auditor will conduct a thorough evaluation encompassing both our physical site and relevant documentation to verify our compliance with mandated safety protocols.

Your unwavering cooperation and proactive engagement are critical to the successful outcome of this audit. I kindly urge each of you to remain vigilant and uphold exemplary safety practices throughout the campus.

Please pay special attention to the following key points:

- Maintain continuous and attentive supervision of all students while on school premises.
- Ensure that emergency exits, firefighting equipment (including fire hoses and extinguishers), stairwells, and all egress points remain completely unobstructed at all times. Storage or placement of any items in these areas is strictly prohibited.
- Keep all corridors, hallways, and pathways clear to facilitate safe and efficient movement throughout the facility.
- Encourage and assist students in properly storing their belongings—bags must be fully placed inside designated cubbies and never left partially out or on the floor, as this poses a significant trip hazard and detracts from our safety standards.

Please be advised that the auditor may conduct inspections in a range of areas including, but not limited to: classrooms, science laboratories, preparation rooms, the canteen, gymnasiums, swimming pool, playgrounds, school entry and exit gates, and clinic.

Your diligence and collaboration are paramount in not only ensuring a safe environment for all but also in showcasing our school's commitment to health and safety excellence.

Attendance and Registration Reminder

This is a reminder to all teachers that it is your professional responsibility to ensure that student attendance is recorded accurately and promptly at the beginning of each day and in secondary grades at the beginning of each lesson.

Attendance data plays a vital role in:

- Ensuring student safety and accountability on campus
- Supporting emergency evacuations and safeguarding procedures
- Informing student reports and long-term records
- Meeting daily reporting requirements to ADEK

Please remember that attendance must not be overridden once submitted. If a change is required, it must be made through Reception only.

All absences should be marked with a reason, where applicable, to ensure clarity for staff and parents.

Thank you for your attention to this important matter and for supporting the safety and wellbeing of our students.

Reminder: Nut-Free Campus Policy

As part of our ongoing commitment to student health and safety, we remind all staff and community members that Taaleem schools strictly operate as nut-free campuses in accordance with Taaleem's policy.

Due to the presence of students with severe nut allergies, bringing any food items containing peanuts, tree nuts, or nut-based products onto campus is strictly prohibited for everyone. Even trace amounts pose a serious health risk.

Staff Responsibilities:

- Do not bring nut-based foods to campus.
- Remind students not to bring or share nut-containing snacks or meals.
- If a student is found with nut-containing food, do not allow consumption and immediately report the incident via email to the School Head and Operations Team for appropriate follow-up.

Your vigilance and cooperation are essential in ensuring a safe environment for all students. Thank you for your support.

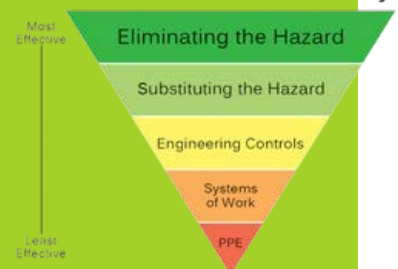

Health and Safety Reminders

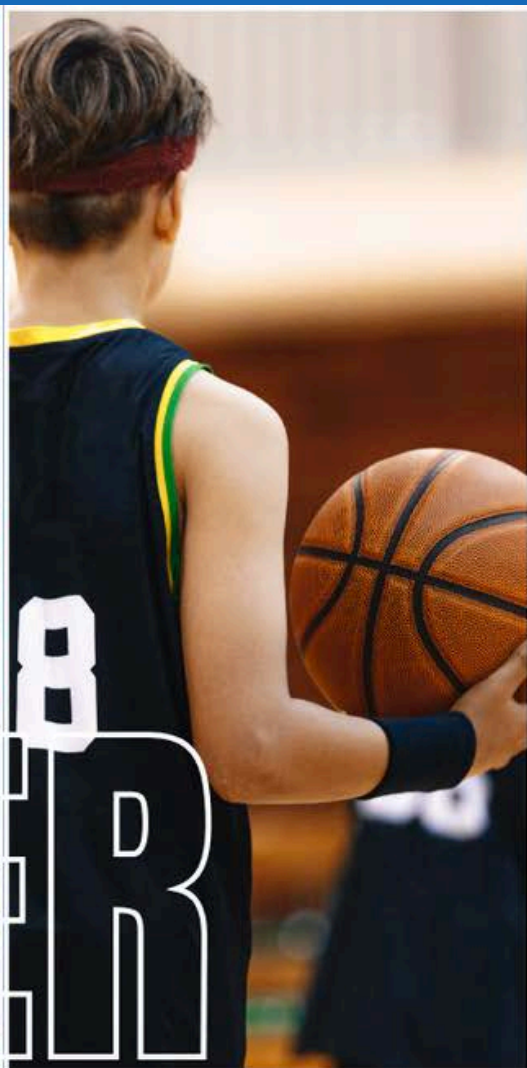

Safety First: Think Hazards, Think Control

When planning any school event, trip, or activity, remember to:

- Identify potential hazards associated with the activity.
- Consult the hierarchy of control to mitigate risks effectively.
- Let's prioritize safety in every stage of planning to ensure a secure and successful event.
